Shawn,

Per our meeting, we need to be very clear on several issues. As of today you are to cease all mining and rock collecting activities on the property. There have been several discussions with us and members of DOGMA concerning the proper areas in which we have permission to mine. Either you or your employees have chosen to ignore these conversations. After the fire late last year we met and had discussions with DOGMA concerning mining out of approved areas. On May 17th you were again mining outside of the permitted area. At that time we had no agreement for rock excavation with you. As of today you still have a balance of money owed to us. You were to pay us the balance last week and once again did not. Additionally, I left you no less than 6 messages about the meeting with DOGMA this morning and again you missed it.

We need payment in full now or we will contact your clients and begin to lien properties to cover the rock you have not paid for.
